

MANAGED WI-FI IS A GREAT VALUE

Professional Installation: \$89.95

After you sign up for Managed Wi-Fi, we'll assess your existing wireless network to check for interference and coverage and take signal strength readings. We'll also talk to you to understand where you want Wi-Fi coverage. Once our equipment is installed, we'll take signal strength readings again to compare them with prior coverage and verify requested coverage. Extending the Wi-Fi signal to additional buildings on the same property may involve additional installation costs.

Installation also includes connecting up to six devices to your Wi-Fi network.

Managed Wi-Fi Service: \$10.95/month

This service includes one wireless router and up to one mesh extender, which will accommodate the needs of more than 95% of homes in our service area. Should additional mesh extenders be required to provide coverage in larger buildings, they're available for an added \$4.95/month.

For even more value, save money by combining Managed Wi-Fi with FiberTV Protection.

Managed Wi-Fi works in conjunction with your broadband internet service from Panora Telco or Guthrie Center Communications. There are no contracts required, but some users enter a two-year agreement to offset installation costs. Hardware replacement is included as part of service. The warranty requires that Panora Telco and Guthrie Center Communications receive inoperable equipment back in exchange for deploying replacement hardware.

WHETHER YOU'RE RUNNING
A BUSINESS OR A HOUSEHOLD,
YOU HAVE ENOUGH ON YOUR PLATE

Let us handle all things Wi-Fi—from selecting and installing the right Wi-Fi equipment to ongoing maintenance, upgrades, and technical support.

EXPAND YOUR COVERAGE
AND SIMPLIFY YOUR LIFE
MANAGED WI-FI

Wi-Fi is a critical component of internet connectivity. Just think about the number of wireless devices being used by your employees or family members including laptops, tablets, and smartphones. You need a wireless connection that is reliable and secure, and consumer-grade Wi-Fi access points are no longer adequate to meet the needs of most environments.

Managed Wi-Fi from Panora Telco and Guthrie Center Communications is your local answer to the challenges of wireless connections in homes, farms, retail stores, office buildings, restaurants, and more. The first step is for us to conduct a site survey of your location, along with your coverage and usage needs. We'll then provide you with recommendations regarding the Wi-Fi equipment required and where it should be located.

You get it all with Managed Wi-Fi:

- Wi-Fi 6, the latest generation of Wi-Fi technology
- Reliable Wi-Fi performance
- Extended coverage
- Carrier-grade equipment
- Ease of deployment and scalability
- Local service and support

BENEFITS OF MANAGED WI-FI

Reliable Wi-Fi Coverage Throughout Your Space

Say goodbye to the frustration of having areas with a poor Wi-Fi signal or no signal at all. With Managed Wi-Fi, you'll have strong, continuous coverage everywhere you want it. Wi-Fi signal strength readings are taken before and after company-provided installation to compare coverage and establish baseline Wi-Fi performance at the location.

Carrier-Grade Router for Better Performance

Managed Wi-Fi includes the use of a wireless router, which we own, maintain, and upgrade. This means you don't have to buy equipment only to have to replace it when trouble arises or the technology changes. What's more, this router provides a higher level of Wi-Fi performance than the consumer-grade routers available through retail channels.

Low, Predictable Costs

Once professional installation is complete, you pay only a small monthly fee which includes use of the equipment as well as convenient remote tech support.

Smartphone App to Manage Access and Security

Managed Wi-Fi also includes a smartphone app so you can easily manage your Wi-Fi network from anywhere and monitor its usage.

Flexibility to Meet Your Growing Needs

Need additional Wi-Fi coverage due to expansion of your space? No problem. We can add coverage to your network with a mesh extender.

Local Tech Support

You get help when you need it from Panora Telco and Guthrie Center Communications. Should you experience Wi-Fi performance issues, simply contact us for trouble resolution. Managed Wi-Fi includes convenient remote support via a cloud-based management portal, which allows our technicians to view your router and wireless connected devices.

Most trouble can be resolved remotely, often without the need for customer involvement. For issues requiring customer interaction to resolve, we'll provide remote managed Wi-Fi support via a phone appointment during business hours. We'll also provide regular system maintenance remotely and will verify system updates and firmware.
